# Setup for Realistic Engine Sounds:

---

Firstly import Realistic Engine Sounds V1 or V2 and later import RealisticEngineSounds\_V1\_Prefabs.unitypackage, or RealisticEngineSounds\_V2\_Prefabs.unitypackage.

With these .unitypackages you will get engine sound and turbo prefabs and demo scenes for Realistic Engine Sounds.

For supported vehicle physics controllers add the right script to these prefabs. (For example: for Edys Vehicle Physics you need to add EdysToRes.cs script to these engine sound prefabs prefabs.)

# License

---

You can use this asset for unlimited games.

One license per seat for personal and commercial use.

**You can't resell or redistribute the package or any single file from the package on any store!**

# Credits

---

All of the sound files are recorded, created and mastered by me.

I would like to say a *Thank You* for my friends who let me record their car's sound for this sound pack.
