Each sound pack has an "Aggressiveness" sfx value which will change each sound packs sounding to a more aggressive sound. It is good for games where you can tune your cars, increase aggressiveness value when an engine upgrade applied or also good for imitating "open exhausts" for modified cars.

Wind Noise Audio Settings:

You can change the Wind Noise Sound's volume and sound clips in each fmod project. Wind sound fx is not designed to be turned off because it adds realism to the sound packs, but you can turn it's volume down of you don't want to use it.
