- Prefabs made for Realistic Engine Sounds 2 packed inside a .unitypackage

Import the prefabs made for Realistic Engine Sounds 2

If you want to use this sound pack with **Realistic Engine Sounds 2** unity asset, import *RES2_Turbo.unitypackage* into your project to get the prefabs and turbo controller script made for *Realistic Engine Sounds 2.*

Drag and drop one of the newly imported prefab into a RES2 engine sound prefab.

Importing the *unitypackage* without *Realistic Engine Sounds 2* already being in your project will give errors in the newly imported prefabs.

Importing prefabs for deprecated version of RES

Firstly backup your project, delete the older version of this asset, then import Deprecated_RES1_Turbo.unitypackage to get the turbo prefabs and controller script made for RES v1.

I would like to say a *Thank You* to my friends and customers who let me record their vehicles or who sent to me their recordings of vehicle's engine sounds and other sounds.

Send your own recordings to me and I will turn them into complete engine sound packs. These recordings should be good quality videos / audios without wind and other unwanted background noises (like crowd, people talk, etc). These new sound packs may later appear in new add-on sound packs. You will get a free copy of the finished work only if you have donated your own recorings and it got used for the making of new sound pack(s).

Feel free to contact me if you have any questions or suggestions for this asset.

Please write a review for this asset in the Unity Asset Store. Thank you!
