

Straight Cut Gearbox Sounds

Volume 1

By: Skril Studio

Thank you for purchasing Straight Cut Gearbox Sounds – Vol.1!

Package includes:

- 15 different gearbox sound packs (20 wav files per sound pack)
- Seamlessly looping on_load and off_load sound clips (there are 4 looping sound clips in each sound pack)
- One shot sound clips for engine load „wobble” imitation (16 clips per sound pack)
- Altogether this product contain 300 wav audio files (150 sound clips for exterior camera view and 150 for interior camera view)

Sound clips usage explaining:

All sound clips pitch and volume is determined by the vehicle *current speed* value. At 0 *current speed* the sound effect should not be heard at all.

Explaining sound clips usage within one sound pack, all of these sound clips share the same volume and pitch value – as mentioned above:

- gearbox_on: played during acceleration or constant speed (engine load = 1)
- gearbox_off: played during deceleration or when gas pedal got released (engine load = 0)
- gearbox_shoot_on: play randomly one shot from one of these sound clips when gas pedal just got pressed down, or when the car is changing gears (engine load = 1)
- gearbox_shoot_off: play randomly one shot from one of these sound clips when gas pedal just got released (engine load = 0)

Credits

I would like to say a ***Thank You*** to my friends and customers who let me record their vehicles or who sent to me their recordings of vehicle's engine sounds and other sounds.

Send your own recordings to me and I will turn them into complete engine sound packs. These recordings should be good quality videos / audios without wind and other unwanted background noises (like crowd, people talk, etc). These new sound packs may later appear in new add-on sound packs. You will get a free copy of the finished work only if your recordings got used for the making of new sound pack(s).

Feel free to contact me if you have any questions or suggestions for this asset.

Please write a review for this asset in the store. Thank you!
