

Exotic Car Engine Sounds

Add-on sound pack for Realistic Engine Sounds 2

By: Skril Studio

Thank you for purchasing Exotic Car Engine Sounds!

„Exotic Car Engine Sounds” asset does not contain any scripts, it only has audio files. It is an add-on sound pack made for „Realistic Engine Sounds 2” asset. For the best results use it with „Realistic Engine Sounds 2” which is a vehicle engine sound simulator asset.

Get *Realistic Engine Sounds 2* here: <https://bit.ly/3aZ50Ag>

Package includes:

- 10 complete engine sound packs:
 - V8 Italian 3.9L
 - V8 German 4.0L
 - V8 British 5.0L
 - V10 Italian 5.2L
 - V12 British 5.9L
 - V12 Italian 6.2L
 - V12 Italian 6.3L
 - V12 Italian 6.5L
 - W16 German 8.0L
 - Flat6 German 4.0L
- 400 wav audio files (200 for exterior view and 200 for interior view)
- Prefabs made for Realistic Engine Sounds 2 are packed inside a .unitypackage
- Each engine sound pack have seamlessly looping sound clips of stationary rpms named like this:
idle, idle-low, low, low-med, med, med-high, high, very-high and *maxRPM*. All of these sound clips (except idle and maxRPM) have „*engine on load*” and „*engine off load*” versions. Engine startup and engine-stop sound clips are also included. Each engine sound pack also includes its own „Aggressiveness SFX”, which is used by **Realistic Engine Sounds 2** to mimic open or modified exhaust systems or engine tunings. It can turn a stock-sounding engine into a more aggressive vehicle sound.

Import the prefabs made for Realistic Engine Sounds 2

If you want to use this sound pack with **Realistic Engine Sounds 2** unity asset, import ***RES2_Exotic_Prefabs.unitypackage*** into your project to get the prefabs made for *Realistic Engine Sounds 2*.

After importing the above mentioned .unitypackage, the new engine sound prefabs will be added in 3 different quality levels into the following folder:
RES2_Exotic_Engine_Sounds\Assets\Prefabs\Engine_Prefabs

6 demo scenes will be available in the following folder:
RES2_Exotic_Engine_Sounds\DemoScene

Drag and drop one of the newly imported prefab into a vehicle physics compatibility prefab and you're ready to test these new sounds (*Realistic Engine Sounds 2 comes with pre-made compatibility made for some vehicle physic controllers*).

Importing *RES2_Exotic_Prefabs.unitypackage* without *Realistic Engine Sounds 2* already being in your project will give errors in the newly imported prefabs.

Upgrading from previous version

Firstly backup your project! After that delete the older version of this asset, then import this asset. Import the new prefabs made for RES2 if you're going to use this sound pack with Realistic Engine Sounds 2. After that all engine sound prefabs from this sound pack needs to be re-added to all vehicles.

Setting up the demo scene for vehicle controllers

After importing *RES2_Exotic_Prefabs.unitypackage* you will get 6 demo scenes, 3 demo scenes with names "RequiresCarController_Exotic_CarDemo" are made for testing the sound with a vehicle physics controller. These demo scenes already have the engine sound prefabs and the UI buttons for easy switch between engine sound prefabs, change their „Aggressiveness SFX level” and engine load type (pre-recorded or simulated).

Vehicle Test Scene Setup Tutorial:

To one of the above mentioned scene, add a car and all of its required components (it's stock camera with it's controller script, UI, etc). Make sure your car is working properly without any errors, then drag and drop "RES2 Exotic Car - HQ" gameobject into your car (which has all Exotic Car RES2 prefabs connected to the canvas buttons), reset "RES2 Exotic Car - HQ" gameobject's transform to place it in the center of your vehicle and enable it. Add your vehicle controller's compatibility script made for RES2 to each parent of RES2 prefab pairs, like UVC_RES2, or VPP_RES2 or RCC_RES2, or other similiarly named script (this script translate your car's values to RES2 prefabs). After this, everything should work if it is done correctly.

Credits

I would like to say a ***Thank You*** to my friends and customers who let me record their vehicles or who sent to me their recordings of vehicle's engine sounds and other sounds.

Send your own recordings to me and I will turn them into complete engine sound packs. These recordings should be good quality videos / audios without wind and other unwanted background noises (like crowd, people talk, etc). These new sound packs may later appear in new add-on sound packs. You will get a free copy of the finished work only if you have donated your own recordings and it got used for the making of new sound pack(s).

Feel free to contact me if you have any questions or suggestions for this asset.

Please write a review for this asset in the FAB Marketplace. Thank you!
