Import the prefabs made for Realistic Engine Sounds 2

If you want to use this sound pack with **Realistic Engine Sounds 2** unity asset, import *RES2_SUV_Prefabs.unitypackage* into your project to get the prefabs made for *Realistic Engine Sounds 2.*

After importing the above mentioned .unitypackage, the new engine sound prefabs will be added in 3 different quality levels into the following folder: *RES2_SUV_Engine_Sounds\Assets\Prefabs\Engine_Prefabs*

6 demo scenes will be available in the following folder: *RES2_SUV_Engine_Sounds\DemoScene*

Drag and drop one of the newly imported prefab into a vehicle physics compatibility prefab and you're ready to test these new sounds *(Realistic Engine Sounds 2 comes with pre-made compatibility made for some vehicle physic controllers).*

Importing *RES2_SUV_Prefabs.unitypackage* without *Realistic Engine Sounds 2* already being in your project will give errors in the newly imported prefabs.

I would like to say a *Thank You* to my friends and customers who let me record their vehicles or who sent to me their recordings of vehicle's engine sounds and other sounds.

Send your own recordings to me and I will turn them into complete engine sound packs. These recordings should be good quality videos / audios without wind and other unwanted background noises (like crowd, people talk, etc). These new sound packs may later appear in new add-on sound packs. You will get a free copy of the finished work <u>only</u> if your recordings got used for the making of new sound pack(s).

Feel free to contact me if you have any questions or suggestions for this asset.

Please write a review for this asset in the store. Thank you!
